1. As of entry of the preliminary amendment filed 09/11/2006, claims 8-9, 11, 15-29 are pending in this application as result of the cancellation of claim 1-7, 10, 12-14 and 30.

### **Election/Restrictions**

2. This application contains claims directed to the following patentably distinct species of the claimed invention:

a) Species I, a method for managing a memory defined by claims 8-9, 11, and 20-21, as illustrated in figure 7.

b) Species II, a method for updating a binary search tree residing in computer memory defined by claims 15-19, as illustrated in figure 4.

c) Species III, a method of searching in a binary search tree defined by claims 22-27, as illustrated in figure 3b.

d) Species IV, a binary search tree defined by claims 28-29, as illustrated in figure 2.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, no claim is generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of

an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

A telephone call was made to Mr. Jonathan T. Velasco on 09/28/2006 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

3. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Hung T. Vy whose telephone number is 571-2721954. The examiner can normally be reached on 8.30am - 5.30 pm.
